

Fenologia e catture interessanti di uccelli inanellati in provincia di Venezia - anni 1996 - 2012 - risultati preliminari

Introduzione e metodi

Il presente lavoro riguarda le catture di uccelli effettuate durante le sessioni di inanellamento in provincia di Venezia in varie località tra il 1996 e il 2012. Vengono riportate le prime elaborazioni sui dati raccolti.

Risultati

Complessivamente sono state effettuate 7929 catture relative a 71 specie. Nella tabella 1 è riportato il numero delle catture suddiviso per località e in tabella 2 suddiviso per i mesi dell'anno. Nella tabella 3 sono riportati i dettagli relativi ad alcune specie catturate ritenute di particolare interesse. Nelle figure 1-50 sono riportate le fenologie di cattura, suddivise per decenni, relative alle specie con almeno 2-3 catture effettuate. La nomenclatura e l'ordine delle specie segue Stival et. al (2018). Il basettino (*Panurus biarmicus*) è stato rilevato (68 catture) esclusivamente nella Palude di Cona negli anni 1996 e 1997.

Tabella 1. Numero di catture suddiviso per località.

Località	Catture
Angioletti Gaggio	3937
Cà Sabbioni	2516
Cave del Praello	715
Palude di Cona	622
Cà Savio	102
Cave di Salzano	20
S.Liberale-Ormesani	7
San Donà-Disarica	7
Valle Dogà	2
Venezia-San Michele	1

Tabella 2. Numero di catture suddiviso per mesi.

Mese	Catture
Gennaio	42
Febbraio	76
Marzo	573
Aprile	883
Maggio	485
Giugno	296
Luglio	442
Agosto	1431
Settembre	2113
Ottobre	1162
Novembre	329
Dicembre	97

Tabella 3. Elenco delle catture relative ad alcune specie ritenute di particolare interesse.

Data	Località	Comune	Specie
24/03/2007	Angioletti Gaggio	Marcon	Luì piccolo siberiano
08/09/2007	Angioletti Gaggio	Marcon	Usignolo maggiore
05/04/2008	Angioletti Gaggio	Marcon	Sterpazzolina comune
03/05/2008	Angioletti Gaggio	Marcon	Sterpazzolina comune
27/03/2009	Angioletti Gaggio	Marcon	Forapaglie castagnolo
19/09/2009	Angioletti Gaggio	Marcon	Pettazzurro
21/10/2010	Angioletti Gaggio	Marcon	Forapaglie castagnolo
15/03/2011	Angioletti Gaggio	Marcon	Luì piccolo siberiano
05/04/2012	Angioletti Gaggio	Marcon	Sterpazzolina comune
14/08/2012	Angioletti Gaggio	Marcon	Succiacapre
30/08/2012	Angioletti Gaggio	Marcon	Pettazzurro
17/08/2003	Cà Sabbioni	Venezia	Usignolo maggiore
23/08/2003	Cà Sabbioni	Venezia	Usignolo maggiore
07/10/2004	Cà Savio	Cavallino-Treporti	Prispolone
15/10/2005	Cà Savio	Cavallino-Treporti	Succiacapre
04/09/1999	Cave del Praello	Marcon	Succiacapre
23/03/1996	Palude di Cona	Venezia	Forapaglie castagnolo
23/03/1996	Palude di Cona	Venezia	Pettazzurro
24/03/1996	Palude di Cona	Venezia	Forapaglie castagnolo
24/03/1996	Palude di Cona	Venezia	Forapaglie castagnolo
06/04/1996	Palude di Cona	Venezia	Forapaglie castagnolo
08/09/1996	Palude di Cona	Venezia	Pettazzurro
23/11/1996	Palude di Cona	Venezia	Forapaglie castagnolo

24/11/1996	Palude di Cona	Venezia	Forapaglie castagnolo
09/08/1997	Palude di Cona	Venezia	Salciaiola
13/09/1997	Palude di Cona	Venezia	Pettazzurro
13/09/1997	Palude di Cona	Venezia	Pettazzurro
29/11/2003	San Donà-Discarica	San Donà di Piave	Gabbiano reale nordico

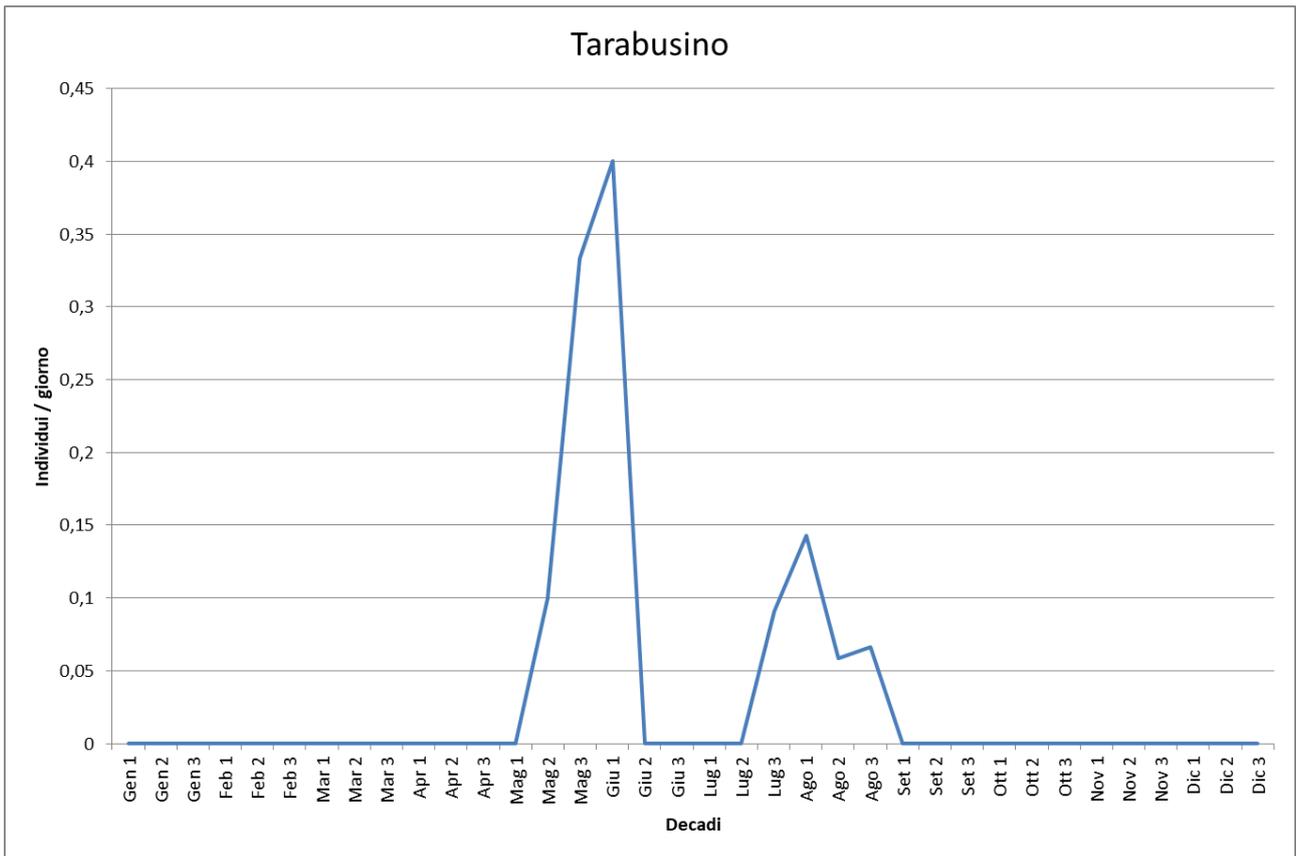

Tabella 4. Elenco di tutte le specie trattate in ordine tassonomico.

Tarabusino	<i>Ixobrychus minutus</i>
Sparviere	<i>Accipiter nisus</i>
Cuculo	<i>Cuculus canorus</i>
Succiacapre	<i>Caprimulgus europaeus</i>
Martin pescatore	<i>Alcedo atthis</i>
Torcicollo	<i>Jynx torquilla</i>
Picchio rosso maggiore	<i>Dendrocopos major</i>
Picchio verde	<i>Picus viridis</i>
Averla piccola	<i>Lanius collurio</i>
Ghiandaia	<i>Garrulus glandarius</i>
Gazza	<i>Pica pica</i>
Cinciarella	<i>Cyanistes caeruleus</i>
Cinciallegra	<i>Parus major</i>
Pendolino	<i>Remiz pendulinus</i>
Basettino	<i>Panurus biarmicus</i>
Rondine	<i>Hirundo rustica</i>
Usignolo di fiume	<i>Cettia cetti</i>
Codibugnolo	<i>Aegithalos caudatus</i>
Luì grosso	<i>Phylloscopus trochilus</i>
Luì piccolo	<i>Phylloscopus collybita</i>
Luì verde	<i>Phylloscopus sibilatrix</i>
Cannareccione	<i>Acrocephalus arundinaceus</i>
Forapaglie castagnolo	<i>Acrocephalus melanopogon</i>
Forapaglie comune	<i>Acrocephalus schoenobaenus</i>
Cannaiola comune	<i>Acrocephalus scirpaceus</i>
Cannaiola verdognola	<i>Acrocephalus palustris</i>
Canapino comune	<i>Hippolais polyglotta</i>
Canapino maggiore	<i>Hippolais icterina</i>
Capinera	<i>Sylvia atricapilla</i>
Beccafico	<i>Sylvia borin</i>
Bigiarella	<i>Sylvia curruca</i>
Sterpazzola	<i>Sylvia communis</i>
Sterpazzolina comune	<i>Sylvia cantillans</i>
Fiorrancino	<i>Regulus ignicapilla</i>
Regolo	<i>Regulus regulus</i>
Scricciolo	<i>Troglodytes troglodytes</i>
Sturno	<i>Sturnus vulgaris</i>

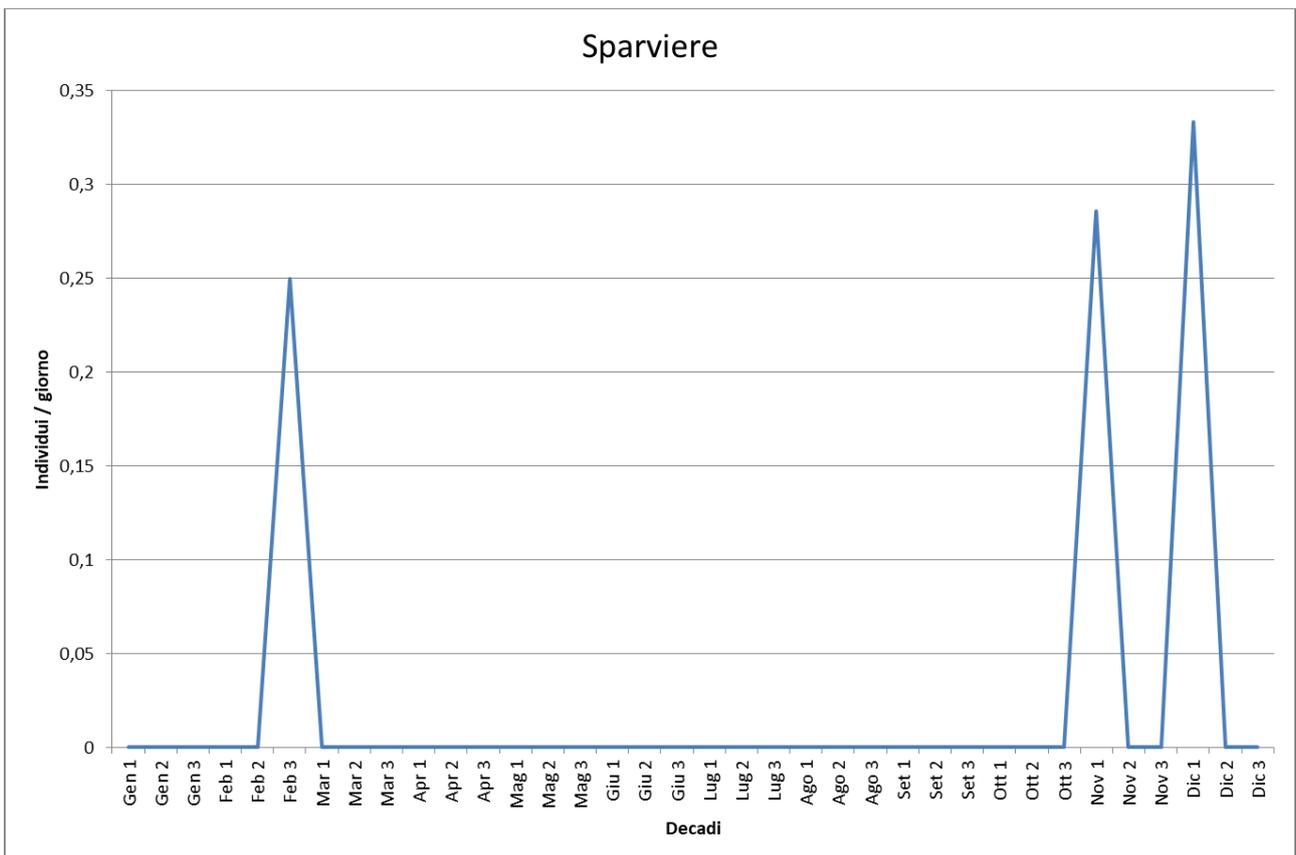

Merlo	<i>Turdus merula</i>
Tordo bottaccio	<i>Turdus philomelos</i>
Pigliamosche	<i>Muscicapa striata</i>
Pettiroso	<i>Erithacus rubecula</i>
Pettazzurro	<i>Luscinia svecica</i>
Usignolo maggiore	<i>Luscinia luscinia</i>
Usignolo	<i>Luscinia megarhynchos</i>
Balia nera	<i>Ficedula hypoleuca</i>
Codirosso comune	<i>Phoenicurus phoenicurus</i>
Stiaccino	<i>Saxicola rubetra</i>
Passera d'Italia	<i>Passer italiae</i>
Passera mattugia	<i>Passer montanus</i>
Passera scopaiola	<i>Prunella modularis</i>
Cutrettola	<i>Motacilla flava</i>
Fringuello	<i>Fringilla coelebs</i>
Verdone	<i>Chloris chloris</i>
Cardellino	<i>Carduelis carduelis</i>
Verzellino	<i>Serinus serinus</i>
Migliarino di palude	<i>Emberiza schoeniclus</i>

Figure 1 - 50. Fenologia delle specie trattate suddivise per decenni.

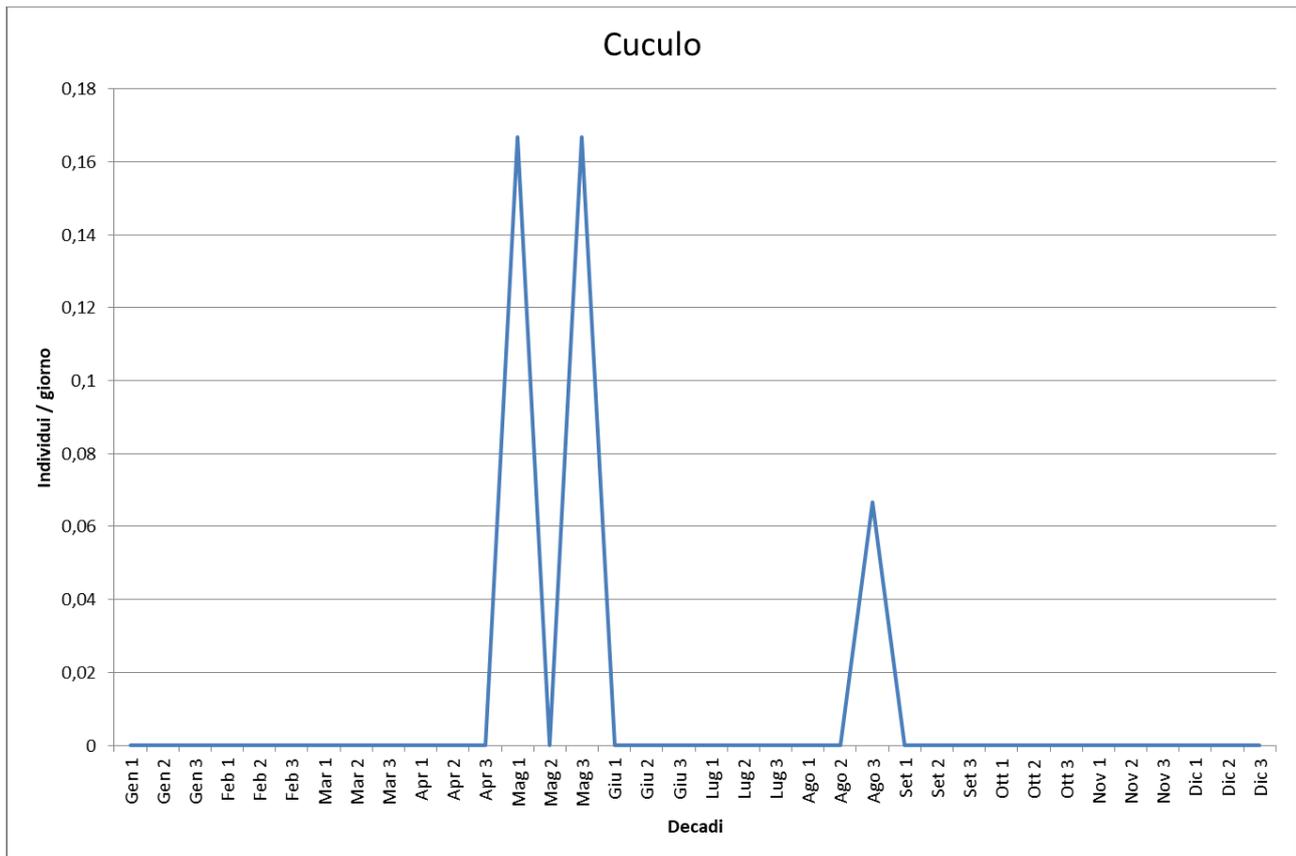

Pelecaniformes - Ardeidae

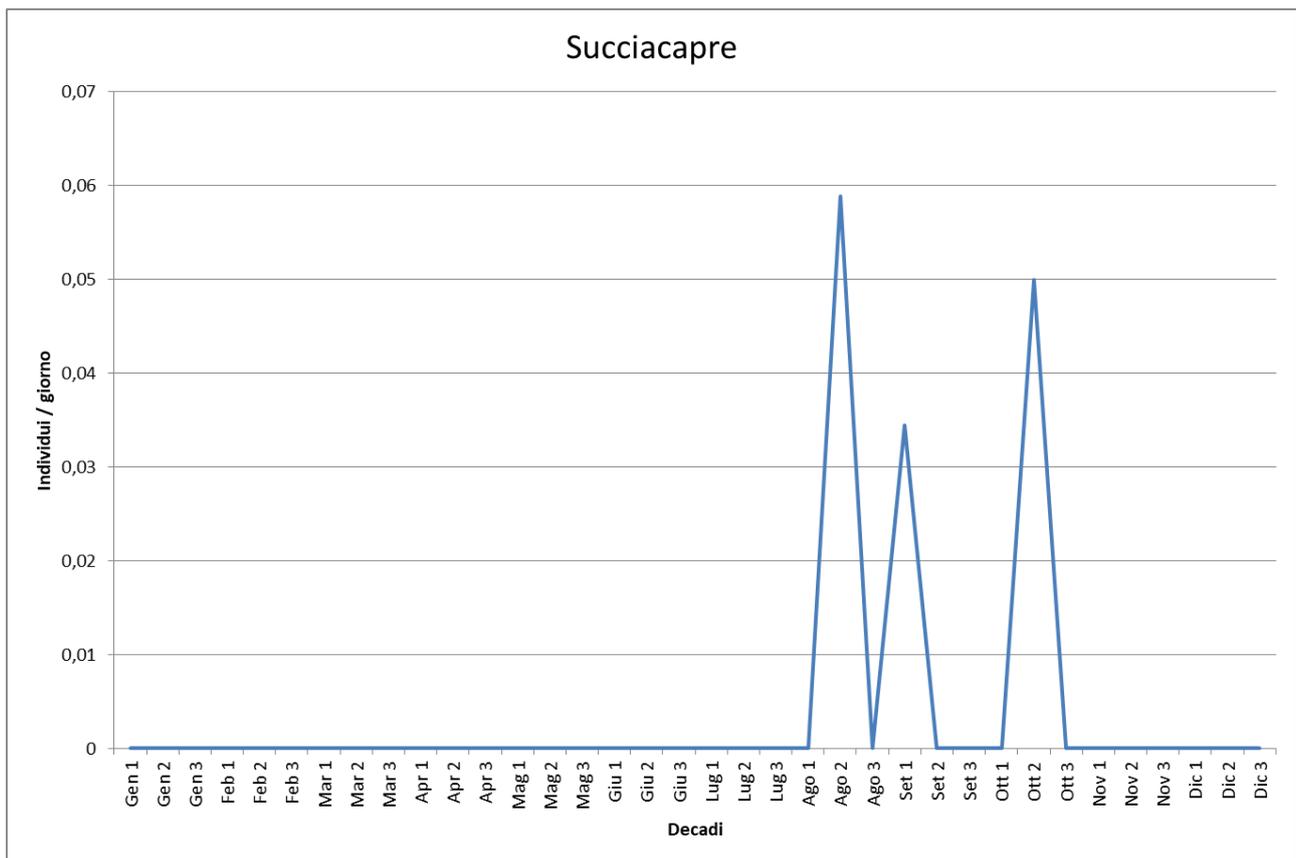

Accipitriformes - Accipitridae
